Hardware Requirements:

- Any Laptop with decent RAM and processing power.
- Apple Mac, if you want to build iOS apps.
- iPhone for testing iOS apps
- Android Phone for testing Android apps.

Software Requirements:

1. Install NodeJS. Take a look at `https://nodejs.org/en/download/`
2. Install Software SDK's depending on the platform you are building.
   - Xcode Installation: Take a look at `https://developer.apple.com/support/xcode/`
   - Android Studio Installation: Take a look at `https://developer.android.com/studio/install.html`
3. Install Ionic and Cordova CLI

   ```
   $ npm install –g ionic cordova
   ```
